

“Recycle Aluminum Cans-over and over again”

Dear Adam and Eve:

I was wondering just how many times can an aluminum can be recycled?

Thanks, Marcy

Dear Marcy,

Surprise! You can always recycle aluminum cans no matter how many times it has been recycled previously.

Also, did you know that, for every aluminum can that you recycle, you save enough energy to run your TV for 3 hours!!

I got both of these bits of information regarding aluminum cans from Bill Nye, The Science Guy, on the Weather Channel. You can get a lot of environmental issue information from the Weather Channel, either by watching on TV or going to www.TheWeatherChannel.com

Here's a challenge: try to pay for your family's TV time by making sure you recycle enough aluminum cans to offset every hour of TV that is watched on every TV in your home!

RETHINK! REDUCE! REUSE! RECYCLE!
